EXPERIENCE

[Moperclub](#), Buenos Aires — *Full stack developer*

MAY 2022- MAY 2024

Technologies: Go(Fiber), Supabase, Next JS

Solid foundation in backend, including API development and database management as well as client-side architecture.

[Lienzo de plata](#), Remote— *Full stack developer*

MAY 2024 - AUGUST 2024

Proven track record of designing, developing, and optimizing scalable web applications with rich designs and functionalities.

[Frupys](#), Remote — *Full stack developer*

AUGUST 2024- CURRENT

Expertise in building responsive, interactive user interfaces using React / Next.js, Astro.

EDUCATION

UBA, Argentina — *Software Engineering*

2022 - 2027

In low level systems developed a CPU cache driver, as well as created key components for an 8 bit word CPU.

Developed Algorithms and data structures like: BST, B-Tree, Heaps, Graphs, Dijkstra, mergesort, quicksort, heapsort, etc.

Agustiniano Campestre, Colombia— *High School*

JANUARY 2018 - AUGUST 2022

Showed high level skills as well as being the best score student in the national exam by a margin of 4 years

Projects— *Websites / Apps*

Can be found at: stevenmolina.vercel.app

SKILLS

Low-level computer knowledge.

Algorithms and data structures.

Full stack experience

Databases and SQL knowledge

Programming Languages

Python

Typescript

Go

C

Rust

Frameworks and Tools

Frontend: Astro, Next JS

Python Backend: Flask, Django, FastAPI

Go Backend: Fiber

Git / Github

DBs: PostgreSQL, SQLite, MySQL, Mongo

LANGUAGES

Spanish (Native)

English (C1)

Portuguese(A2)
